

Dr. Theresa Gonzalez DVM

After 10 years as a wildlife biologist in the Southwest, Dr. Gonzalez pursued her dream of becoming a Veterinarian in 1986 only to find she was disappointed in the standard, 1990's, approach to treating animals by masking symptoms with painkillers and steroids.

An opportunity opened up for her to study Healing Touch for Animals. With the encouragement of the nurse-instructors, who had seen amazing results with their human hospital patients, she continued to advanced training. Once her eyes were opened to alternative healing methods an amazing path opened up.

Opportunities appeared for education and training with teachers that were top in their fields. Dr. Gonzalez' willingness to explore these alternative healing methods led to her working with Hazel Parcels, a pioneer in distance healing, Dr. Richard Pitcairn who taught homeopathy for animals, and Dr, Donald Epstein who developed network chiropractic. Studies with the developers of Matrix Energetics, Reconnective Therapy, Organ Regeneration, Tellington Touch, Simply Healed, Bengston Technique, and studies in Acupuncture, Reiki, EFT and other modalities has led to her current study of geopathic dowsing.

A member of the American Holistic Veterinary Medical Association, Dr Gonzalez learned how to muscle test and use a pendulum for healing from Hazel Parcels in 1990, and has been using both as key tools in her 29 -year practice with dogs, cats, horses, birds, rabbits, hamsters, pigs, goats and even lizards!
