## Mission Statement

I am passionate about Dowsing. I have been passionate about it and sharing my knowledge ever since I learned it from Hazel Parcels in 1990.

Dowsing is one of the primary tools I use every day in my work as a Veterinarian. And I know many health practitioners who use Dowsing as a tool in their practice.

It is one of the most empowering tools we can have to navigate our lives.

Now more than ever, with the unreliability of the massive amounts of information we have, it is important for the knowledge of Dowsing to be shared and taught and refined .

I am excited that I have met so many Dowsers here in Tucson and across the country in the last two years since joining the Tucson Dowsers and attending the West Coast Dowsing Conference.

A wonderful surprise has been the amount of new Dowsing skills and techniques I have learned since joining Tucson Dowsers. The content has opened my eyes and I am excited to get to know new people who are using Dowsing in so many useful and creative ways.

In the past two years my involvement with the Tucson Dowsers has steadily increased. I have now been attending Board meetings for a year. Recognizing the dedication of the Board and grateful to them for keeping this organization alive, I would like to submit my name for consideration for the role of President.

I am focused and passionate about growing Tucson Dowsers so that we can all increase our knowledge, gain new skills and expand the network of Dowsers locally, nationally and worldwide.
